Repairs

- **Preliminary Evaluation** – Laboratory assessment of client sample observing physical and process properties during evaporation.
- **Pilot Testing** – Client attended test at our Charlotte, NC facility. Testing generates product qualification samples, commercial design scale up data, and confirmed operating conditions.
- **Quotation & Design** - LCI engineers develop a total solution to meet our customer's needs, present fixed price proposal, and complete in-house process and mechanical design of evaporators to fully skidded systems.
- **Fabrication** – Evaporators are fabricated in the USA. Your project will be completed on time, on budget, and with the highest quality.
- **Commissioning** – Onsite support during startup of equipment to ensure proper installation and process optimization.
- **Technical Support** –Engineers are available for process advice, in field troubleshooting, and operator training to ensure optimal performance.
- **Field Service & Repairs** – LCI keeps permanent record of your system for immediate 24/7 assistance with service and repairs.
